SafetyLink®
Innovative
Fall Protection

An anchor point designed for use in concrete, where the eyebolt will remain exposed for attachment.

The patented Concrete**Link** is tapered allowing for a sleek design with maximum effectiveness and is tested extensively to maximise energy absorption.

- 360 degrees.
- Low profile.
- 316 stainless steel.
- Multi-directional fall protection.
- Single person anchor, rated at 15kN.
- Must be chemically fastened.
- Fall arrest and rope access anchor.
- Energy absorbing eyebolt, which reduces the force on the person and the structure.

The SafetyLink Brass Cap helps keep the internal thread of the concrete insert clean and free from dirt and debris when the eyebolt is not present.

Benefits of choosing SafetyLink:

SafetyLink's Concrete**Link** is an extremely versatile anchor with a number of different eyebolt/insert combinations. The eyebolt range starts with SafetyLink's Standard Eyebolt which is designed for fall arrest, its long tapered stem is designed to absorb energy while arresting a fall therefore reducing the load off the structure and the person in the event of a fall.

Alternatively SafetyLink's Abseiling Eyebolt is a fall arrest rope access anchor which uses the same tapered concept as the standard eyebolt but incorporates a shorter design enabling the eyebolt to withstand a live load without activating the bending motion that occurs when arresting a fall. Where a low profile design is more desirable a Collared Eyebolt can be used to achieve this.

SafetyLink will provide you with the following:

- All products tested and manufactured to Australian and New Zealand Standards.
- All distributors and installers are trained to use SafetyLink products.
- Supply installation guides, testing results and product sheets.
- Use a qualified and reputable testing authority.
- Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- Installers are qualified to do yearly inspections on your anchors as per Australian and New Zealand Standards.
