WARNINGS

READ CAREFULLY - SOMEONE'S LIFE DEPENDS ON IT

- Read Installation Handbook thoroughly before use.
- Ensure all ladder warnings are complied with at all times.
- Never use a Permanent Ladder to support more than one person.
- Never use a damaged Permanent Ladder.
- Visually inspect Permanent Ladder for any signs of deterioration before each use.
- When using a Permanent Ladder all safety procedures must be complied with in accordance to the correct safety code/s of practice/s for safe work at heights.
- Rivets and bolts should be present and secure before the Permanent Ladder is used.
- Under no circumstances shall any temporary repairs be made to any Permanent Ladder.
- When a Permanent Ladder is to be exposed to a corrosive or an extreme environment which could significantly reduce the working load of the Permanent Ladder, the manufacturer or a competent height safety installer shall be consulted prior to such exposure.
- Ladder should be only used for access. If it is intended to work from a ladder, the work should be light duty and short duration.
- One person is to be on the ladder at any one time (except in emergency situations).
- Three points of contact with the ladder should be maintained on the ladder at all times. For example two feet and one hand, one foot and two hands, two feet and the frontal D ring on a fall arrest harness attached to the fall arrest line.
- When going up or down a ladder you should always face the ladder.
- All rungs are ergonomically designed for maximum grip at all angles.
- Heavy gauge aluminium for superior strength.
- Manufactured to AS 1657:2018 Standard.

MAINTENANCE

- Visually inspect the components of the Permanent Ladder for corrosion. Superficial surface marking is permitted while deeper corrosion or pitting would require attention.
- Materials should not be placed on the Permanent Ladder while in storage.
- Permanent Ladder should be checked prior to every use and maintained in good condition.
- Under no circumstances shall any temporary repairs be made to any Permanent Ladder.

YOUR LIFE DEPENDS UPON THE CONTINUED EFFICIENCY AND DURABILITY OF THE EQUIPMENT, SO, A PROPER INSPECTION IS REQUIRED TO AVOID MISHAPS. IN ADDITION TO SAFETYLINK'S EQUIPMENT, ALL ANCILLARY EQUIPMENT MUST BE INSPECTED IN ACCORDANCE WITH APPLICABLE REGULATORY REQUIREMENTS AND THE MANUFACTURER'S INSTRUCTIONS.

The SafetyLink V-Line is a Vertical Lifeline suitable for use as part of a personal fall protection system. The V-Line offers a Vertical Lifeline with one or multiple shuttles for users to attach with. The V-Line allows users to climb a vertical structure or ladder along a permanently mounted safety cable system.

Systems shall be designed to limit free fall, swing fall and maximise fall clearance. Where possible, systems should be installed as close to the centre of the ladder or climbing zone as possible.

The V-Line Vertical Lifeline shall be installed on an angle no greater than 15 degrees off vertical.

Standards: The V-Line Vertical Lifeline System is compliant with AS/NZS 1891.3 and EN353.1.

User Rating: The V-Line Vertical Lifeline is rated for up to 4 users per system with a maximum user weight of 150kg and a minimum of 50kg.

APPENDIX - CHEMICAL ADHESIVE

POSITIONING OF CONCRETE ANCHOR

The Concrete Anchor must be in a position easily and safely reached from a safe access point. Concrete anchor should not be positioned close to an edge, minimum distance 150mm. Minimum concrete thickness 150mm.

LOCATING THE REINFORCING STEEL BAR (REO BAR) IN THE CONCRETE

Use Digital metal detector (Example: BOSCH DMO 10) to locate the Reo bar in the concrete when positioning the Concrete Anchor. This ensures reo bars are avoided when drilling.

DRILLING THE HOLE

Drill a hole to a depth and width as suggested in below table.

PREPARING THE HOLE

The hole must be moisture and dust free. Remove dust using compressed air, small brush, and vacuum cleaner.

INSTALLING THE CONCRETE ANCHOR

- Recommended chemical is Fischer FIS-V.
- Prior to anchor installation, refer to installation procedure for individual anchor product and check chemical is within expiry date.
- The injection cartridge is for use with a standard caulking gun.
- Partially used cartridges can be re-used by changing the mixing nozzle.
- The entire surface of the anchors embedded section must be within the concrete and shall use sufficient adhesive mortar as specified in the table below.

CURING TIME FIS V

Cartridge Temperature (mortar)	Gelling Time	Temperature at anchoring base	Curing Time
		- 5 C - ± 0 C	24 hours
+ 0 C - + 5 C	13 minutes	± 0 C - + 5 C	3 hours
+ 5 C - + 10 C	9 minutes	+ 5 C - + 10 C	90 minutes
+ 10 C - + 20 C	5 minutes	+ 10 C - + 20 C	60 minutes
+ 20 C - + 30 C	4 minutes	+ 20 C - + 30 C	45 minutes
+ 30 C - + 40 C	2 minutes	+ 30 C - + 40 C	35 minutes

The above times apply from the moment of contact between resin and hardener in the static mixer.

For installation, the cartridge temperature must be at least +5 C. For longer installation times, IE when interruptions occur in work, the mixer should be replaced.

TESTING FOR CONCRETE MOUNTED ANCHOR

To comply with current Standards each Concrete unit must be tested after installation. Allow required curing time as specified in above table before testing. Test consists of pull out force to 50% of design load of anchorage. Note: Drilled-in anchorages such as friction and glued-in anchorages shall be placed so that the shear load is at least twice the tension load. For collared eyebolts this translates to a pull at an angle not exceeding 20 degrees to the surface in which the bolt is installed.

Expert Fall Protection Planning

SafetyLink's design and planning team are here to help work out the positioning of your fall protection system, ensuring all areas of your roof are accessed safely.

Things to consider when planning your roof layout:

- Are all areas of your roof protected, allowing complete access when working at heights?
- Are you protected from the ground up, allowing complete access to your roof?
- Detailed comprehensive documentation provided e.g. installation guides, testing results, product sheets should be provided.
- SafetyLink can also provide you with a qualified and reputable installer of SafetyLink products.

Contact our design team at info@safetylink.com and we can plan your fall arrest system for you.

Steps to becoming a qualified SafetyLink product installer

1

Accreditation

Each user must have their Working at Heights accreditation (RIIWH5204D).

The requirements for installation of any fall protection equipment is to be a competent person. The definition of this is someone with suitable skills, knowledge, experience and training in the height safety industry. In order for you to work at heights you must complete a working at heights accreditation. Contact your local training centre.

2

Insurance

Each user/business entity must have correct insurance for installing height safety equipment.

Certification and annual recertification may have an effect on your Public and Products Liability Insurance. Engaging in these activities may also require you to take out or amend your existing Professional Indemnity Insurance. Because policies vary between insurers it is best you speak to your insurance advisor to ensure your coverage will include these activities.

3

Product Training

Each user must complete and pass each course for the product they are purchasing/installing.

SafetyLink's online training portal (Safety Centre) provides online courses on SafetyLink Anchors. Register yourself for free on SafetyLink's website www.safetylink.com/safetycentre. After completing and passing the product course you will receive a certificate to download and provide to your customer. Certificates are valid for 2 years. Personal training is required for installing lifelines, contact SafetyLink.

4

Certification

Issue a certificate for height safety system certification upon completion of the project.

On completion you should supply certification documents with site layout plan, training certificates, product checklist and manuals to the end user. You should also discuss the wording of any proposed certification with your relevant insurer and legal adviser to ensure you are covered in the event of a claim.
